EXPERT VALVE SOLUTIONS

"We are committed to deliver quality service to our customers with the focus on Continuous Improvement".

Computerized Valve Testing Machine

“ There are no secrets to success. It is the result of preparation, hard work, and learning from failure. ”

Arabian Control Valve Company has been formed in 2016 with the objective of providing expert solutions for the maintenance of Control Valves of Oil & Gas, Petrochemical, Power and Water sectors in Kingdom of Saudi Arabia. ACVC has the experience, knowledge and proven capability that are critical in delivering expert service and maintenance of Industrial Valves.

### Main Strength

Our main strength and support in the field of Process Valves is the joint technical patronage we enjoy with various valve manufacturers and it gives us forte to offer products of different brands.

### Our Quality Policy

We are committed to deliver quality services in the field of maintenance of all types of control and on-off valves, re-manufacturing of valves, removal and re-installation of valves from pipe lines by ensuring full obligation of all employees to the implementation of quality management system. We work closely with all our suppliers to ensure our customers receives best service on time. Continuous improvement of the quality management system shall be our focus in all activities. We also fulfill all the statutory and regulatory requirements applicable to our company

### Key Activities

Our activity covers supply and overhauling of control valves, actuators, instrument accessories and spare parts.

## Our Key Business Activities

### 1) Maintenance and Repair

- Standard maintenance and repair services
- Offering root cause analysis
- In-situ maintenance support (24x7)
- Technical manpower support
- Industrial valve automation

### 2) Commissioning

- Removal, overhauling and re-installation of pipe line valves
- Commissioning assistance
- In-situ termination support
- In-situ online valve calibration

### 3) Spare Parts Management

- Fabrication of spare parts as per OEM Standards.
- Purchasing support & managing
- Inventory of spare parts of different brands.
- Raw material inventory is maintained for the fabrication of spare parts.
- Material identification / bar coding maintained.

### 4) OEM Valves / Spare Parts Support

- ACVC associating with various valve manufacturers to cater the industrial requirements of new valves, actuators and related instrument accessories.

Apart from above, we offer inspection, testing and certification of valves as per industry standards (API 598, ANSI FCI70-2, ISA 75.19 etc)

## Our Salient Features

Oil free rotary screw compressor of 10 bar 375 CFM Capacity.

Air dryer equipped with multiple filters ensure moist free Air.

Flanges of sizes 1/2" to 24" of rating 150 to 900

High pressure Flanges dedicated for 1500 rating for sizes ranges from 1/2" to 12".

Hydro pumps for valve testing.

Third party certified testing equipments.

Third party certified welders.

Dedicated overhauling & test bed for heavy actuators.

Equipped with F/F, HART facility.

Capable of fabricating soft seat ring up to 36".

Raw materials required for fabrication of hard parts and soft parts provided.

MSDS of raw material provided for the fabricated items.

Equipped with 24VDC, 110VDC facility.

Capable of supporting fabrication of spare parts of obsolete model valves.

Technical crew support for major plants turnarounds.

Capability of welding different grades of carbon steel, austenitic, martensitic, PH grades, alloy 20, stellite, duplex, inconel, hastalloy, ferralium, cast iron, aluminium etc.

## Safety Policy

- ACVC believes that " **No job or task is more important than worker's health and safety.** "
- If a job represents a potential safety or health threat, every effort will be made to plan a safe way to complete the task in a safe manner.
- Every procedure must be a safe procedure. Shortcuts in safe procedures by management or any other associates will not be tolerated.
- If a job cannot be done safely ..... it will not be done. Every employee is entitled to a safe and healthful place to work.

Our specialist service teams work closely with customers across middle east to ensure their plants reduce downtime by maintaining their valves and controls assets to the highest standards on 24 x 7 basis.

## Our Facility

- Ventil make Computerized Seat leak and Hydro Testing Equipment for valve sizes ranging from ½" to 24".
- Calibration facility for Pneumatic, Electropneumatic, HART & Fieldbus positioners.
- Rotameters for testing valve leakage upto 50 SCFM.
- Retrofitting of Actuators and Positioners
- Fully Fledged Machine Shop
- Valve Overhauling Facility
- TIG Welding & Hard facing.
- Sandblast, Painting, Hydrobolting and Torquing
- NDT inspection (LPT,MPT etc).
